

Home page - Main features

Search: where the user wants to book to eat, the user can search by location or name of restaurant. If the search is for a location, then as the user types a location an auto complete suggestion of the search will appear for the user, the search will show user a list of all the nearest restaurants available for online booking. If the search is for a restaurant name then an auto complete of the restaurant name will be suggested for the user, the search will show the details of that restaurant (detail, rating, price points).

Date: a drop-down menu will be available for user to click on it will initially start with the date the user is looking at the website and when they click on the drop-down menu a calendar will appear for the user to select a date.

Time: a drop-down menu with an initial time of 7:00 PM will be available for users to click on and then the menu will have a list of all the times from 12-11:30 in 30-minute intervals.

Party-size: A final drop down menu will be available with the initial value being 2 people and when clicked the user can select from 1-20 or 20+.

Business login feature: a button where businesses can login and manage their profile, number of tables available, and individual bookings.

Sign in/sign up: users can sign up with email and a password which when the password is being typed the password will have black dots to hide what the user is typing. Other features could include a forgot password or reset password. Users can log in to make or manage table bookings and manage their information.

Possible features

Get current location: a get current location button which will ask permission for the website to know the users location.

Result page - When users are on the page with a list of restaurants they can scroll through and click on any restaurants with a maximum of 10 restaurants shown on each page.

Possible features

On the left side the page has a filter menu where user can filter by price/location/cuisine

Restaurant page - When user selects a restaurant

Main features
